

-Participial Adjectives-

PART ONE: Directions: In the table below you will see 10 past and present participle adjectives that you may or may not have seen before. In the right column there are sentences for each adjective, but the correct sentence is **not** directly beside each adjective. They are all mixed up!

Work with a partner and try to place the correct adjective in each sentence. Try doing this **without** using a translator. *Ask the teacher if you need a clue!* Sometimes there is more than one possible adjective that could fit into the sentence; choose the one you think is best or feel free to put more than one option!

PART TWO: SHOW & TELL - Directions: Go through each adjective again and this time try to find a picture online or from your personal photos of something that you think matches with each adjective. Copy and paste the photo below. Complete each sentence under each photo giving reason for your choice. ***Send your copy of this document to your teacher afterwards. Each student is going to walk us through their photos at the front of the class like a casual, impromptu presentation.

When you look for pictures, DO NOT GOOGLE THE WORD ITSELF!
 You have to think about the meaning of the adjective and then think of what things or situations you think match with the meaning of the word. For example, if you think skydiving is *thrilling*, find a picture of skydiving.
